Website Design & Development

Simple Logic IT gained reputation as a website design company with a staff of professional website designers and website - e-commerce website developers. Our goal is simple - provide our clients with the best possible web design services at a reasonable price. And, since its inception in 2007, that's what we've been doing. We've built our business on integrity and trust, all of which has earned us a lot of happy referrals and repeat business.

At Simple Logic IT, all of our work is done in-house. We employ a team of professional website designers and developers that have the skill and experience to tackle any challenge, large or small, advanced or basic. We also offer our own, easy-to use, content management system(CMS) and hosting services! Contact us today for a free website design consultation

Hardware & Networking

Hardware & Networking refers to the process of supplying data and information by linking the group of networks using hardware such as switches, hubs, gateways, access points, network interface cards, networking cables. To be more specific, hardware networking includes all peripherals, computers, interface cards and other tools required for communications and data processing in the network. We have a fully trained technical team of Certified Engineers, Semi-Skilled & Non-Technical Staff for providing quick and effective customer support worldwide.

GPS Vehicle Tracking System

GPS vehicle trackers are invaluable tools for monitoring either a single car or an entire fleet of vehicles. A real-time car tracking device gives you up-to-the-minute speed and location updates, including text or email alerts based on parameters you set in advance. If you're wondering if your driver has gone off course or if your teen has been speeding, these vehicle tracking devices give you the answers you need. Detailed reports tell you exactly where a vehicle has been, where it's headed and how fast it's traveling.

We are having an in-house developed web application for vehicle tracking, the features are

Real time monitoring

Play back of a previous journey

Real time speedometer view

Geo Fence

Fuel Consumption Report

Mileage tracking

Show multiple vehicle movements in single screen

Over speed and stoppage reports

Geo fence or location based reports

Optional Module to indicate Fuel level to prevent fuel theft

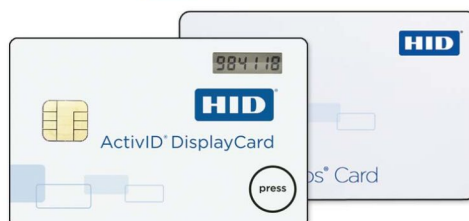

Controlling & monitoring of multiple sensors

Text or Email Alerts

The ERP

ERP software (or enterprise resource planning software) is an integrated system used by organizations to combine, organize and maintain the data necessary for operations. ERP systems merge an organization's key operations, including the manufacturing, distribution, financial, human resources and customer relations departments, into one software system. Simple Logic IT's goal is to ensure each and every ERP project is a success. Our team of experienced consultants helps companies select the right ERP system and implement it properly. Once ERP software is selected, Panorama can assist with the ERP Implementation and organizational change management to ensure the utmost return on investment is obtained and that the project comes to a successful completion. We are proud that our Simple ERP Solution is the back bone of many business giants in Qatar.

Digital Signage

Simple Logic IT is the leading provider of real-time, automated audience measurement solutions for the digital signage and retail industries. The Company's state-of-the art video analytics technology measures visual attention towards posters, digital signs, TV monitors, window and in-store product displays. The field-tested technology and developed software enables measurement of out of home rating by measuring the number of people watching a digital signage screen and the demographics of its viewers.
